

Anti-fogging Component Combination Cloth

BELL CLARO

I can't concentrate
because my glasses
always fog up
when I wear a mask!
It's dangerous
because I can't see!

Try wiping
your glasses with
BELL CLARO
at such times

Prevent fogging over
a long time!
Gain concentration and prevent danger

Effective just
by wiping quickly

There are no doubt many people who **must wear a mask** from the perspective of safety and hygiene in factories and other workplaces.

However, **poor visibility due to fogging** is a problem that comes with wearing a mask.

Accordingly, anti-fogging has an active role to play. Nevertheless, conventional products involve the hassle of thinly spreading out gel and then wiping off the excess.

BELL CLARO contains anti-fogging components on the cloth.

This means you can just wipe your glasses with it quickly, so it is no hassle.

Left Side: After Using BELL CLARO

Precautions

- You cannot wash this product. You will need to buy a new one if it becomes dirty.
- There is a risk of discoloration or deformation if you use the product on tortoiseshell, jewelry, leather or wooden frames.
- It is possible the components may be offset by use on goggles and sunglasses with an anti-fogging action.
